Since the area is industrial, I will probably use the industrial levels we currently have for soil/sediment - however, I'm sending the soil data to you as a compliment to the water data so you have a complete picture...if you think using industrial levels could be a concern for recreational use, just let me know...thanks.

All,

Here are the final results that now have Hg on them. Also see below field notes, times are on chain of custody.
Someone please copy Kendel Posey, I keep getting his email bounced back. You should have complete results from 8-2-12 and 8-3-12.

Thanks

Carla Hayes

Ceceleee and Jorge,

Could we please get a copy of your field notes from the soil sampling and manifest copies to the landfill??

Thanks
